

## Taiyo Nippon Sanso sponsored and exhibited at IWN 2022 (Berlin, Germany) and IWGO 2022 (Nagano)

The CSE Division of the Innovation Unit sponsored, and also exhibited (as a Gold Sponsor), at the International Workshop on Nitride Semiconductors (IWN) 2022 in Berlin, Germany, from October 9 to 14, 2022. This event is an international workshop focusing on the latest progress in group III nitride semiconductors. We presented information on our GaN MOCVD system's products and development, as well as information on our new Ga<sub>2</sub>O<sub>3</sub> MOCVD systems. Since this workshop was held in a face-to-face format, about 800 participants from around the world came to the workshop, and the event saw plenty of activity every day. It was a good opportunity for us to discover new customers, gather information, and gain a foothold for overseas business.

In addition, we also sponsored, and exhibited at, the International Workshop on Gallium Oxide and International Workshop on Gallium Oxide and Related Materials (IWGO) 2022 in Nagano Prefecture, Japan, from October 23 to 27 last year. This event is the most prestigious international conference on Ga<sub>2</sub>O<sub>3</sub> and related materials. In addition to introducing our equipment at our own booth, our division presented the results of latest developments. Many participants came from universities and research departments making it a good opportunity for us to gather information and promote our technology in the fields of future research and development.
